

Juniper (14192) Staff Impression

Juniper is truly wonderful. He is intelligent, goal oriented, very handsome, and has a friendly personality. He has captivating brown eyes, dark brown hair, and an olive skin tone. We thoroughly enjoyed our conversation with Juniper and were extremely impressed that he not only works in government but is also currently pursuing his master's degree in environmental science! This sense of hardworking multi-tasking did not come as a surprise when he disclosed that his parents instilled a hard-working attitude and compassionate values in him.

Juniper has been to several countries but looks back on backpacking through Europe the most. Juniper's sense of adventure is enlightening, and we enjoyed listening about how passionate he is about traveling. In his free time, he enjoys any outdoor activity including hiking, kayaking, and sports. In addition to outdoor activities, he has an empathetic side for animals. Juniper made clear that he loves to raise dogs and enjoys finding different dog rescues. Overall, this donor is a real catch, with an open minded, kind, and warm personality. Though he does not have the desire to have children himself, he would like to help others who desire to have their own family. We are so grateful to have him in our program!
