

### **Timber (12572) Staff Impression**

Timber is a slender and fit endurance athlete who swims, runs, and cycles long distances in addition to enjoying softball, yoga, and snowboarding. He has a handsome rectangular face with deep-set eyes, a mid-sized nose, a broad smile, a square chin, and a strong jawline.

Timber is a cheerful, good-natured dreamer who always brightens the atmosphere when he visits our clinic. He is exceptionally curious, ambitious, and detail-oriented, and hard-working, which are valuable traits in his career as a structural engineer. He lives a frugal lifestyle in hopes of being able to retire early to enjoy quality time with loved ones, traveling the world, and spending time backpacking in the wilderness. We think this intelligent and talented donor is a wonderful guy and we are excited to have him in our program.
