

## **Barrett Staff Impression**

Barrett stands at 6'2" and has an athletic build. He keeps a very active lifestyle and enjoys working out, long distance running, hiking (he even hiked the Appalachian Trail) and anything that can take him outdoors. Barrett craves physical activity and pushing his limits. Barrett has striking blue eyes that stand in contrast against his straight, red hair. He has fair skin and like most redheads has quite a few freckles. Barrett goes between clean shaven and rocking a full beard and everything in between, all of which compliment him. Barrett is a very attractive donor, and his outstanding personality just adds to that.

Barrett is a former K-9 trainer and handler in the US Army. He is loyal, hardworking and driven in his pursuit of personal goals and ambitions. This type of focus is what has enabled him to achieve so much. He is currently working on his Emergency Medicine and Pre-hospital Care. Initially he will be an EMT, but his long-term goal is back country/wilderness first response i.e. Search and Rescue crew.

Barrett has many talents and skills. He is especially gifted in music. He is a classically trained percussionist. He has played in multiple types of bands, Swing, Jazz and Marching in particular. This love of music is what led him to begin teaching guitar to veterans.

This type of selflessness and care for others makes Barrett a fantastic addition to our donor program and we're happy to have him.
