Seattle Sperm Bank

MEDICAL UPDATE LETTER FOR DONOR #9581 (CAMERON) - 2025-10-14

A child conceived from donor #9581 (Cameron) was diagnosed with situs inversus totalis.

To Whom it May Concern,

We are writing to provide a medical update regarding Donor #9581 (Cameron).

This letter is intended for all recipients and facilities who have purchased vials from donor #9581 (Cameron)

Updated Medical Information:
Seattle Sperm Bank was informed that a child conceived from donor #9581 (Cameron) has been diagnosed with situs inversus totalis, a congenital condition in which the major visceral organs are reversed or mirrored from their normal positions. At this time, the affected child has not undergone genetic testing and the cause of their condition is not known.

No other recipients of donor #9581 (Cameron) have contacted Seattle Sperm Bank to report situs inversus totalis.

The recurrence risk or chance that half-siblings could be affected with situs inversus totalis is difficult to predict based on the information available for review. Sometimes situs inversus totalis is sporadic, meaning it occurs as an isolated case. In other cases, it can be inherited and the chances of the condition recurring in other family members is increased.

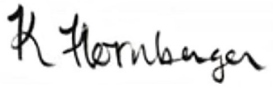

Children conceived from donor #9581 (Cameron) may have an increased chance for situs inversus totalis and related findings.

Next Steps for Families who have Utilized the Donor:
We encourage you to share this update with your child's pediatrician and/or providers involved in your fertility treatment and prenatal care, as additional discussion may be warranted

If Seattle Sperm Bank receives new information that would impact the chance for other medical conditions in children of this donor, we will inform you by sending a follow-up letter. Please notify Seattle Sperm Bank of births and or pregnancies beyond the first trimester using SSB's birth reporting webpage and notify the genetics team if your child has been diagnosed with any medical finding.

Do not hesitate to reach out if questions arise or if clarification would be helpful. You are welcome to schedule a phone consultation with one of Seattle Sperm Bank's certified genetic counselors if you would like to discuss this information over the phone.
